

Wyoming Psychological Association, in brief

Purpose: the advancement of psychology as a science, as a profession, and as a means of promoting human welfare.

Vision: In the frontier state of Wyoming, WPA recognizes the need to pursue a mutually supportive strong community of psychologists who work together to enhance the quality of life for all people living in the state.

WPA enhances your professional identity, and is the only state association devoted to representing the needs of psychology professionals in Wyoming. Through legislation and negotiation, WPA provides leadership in shaping and implementing policies crucial to psychology, addressing critical issues such as licensing, scope of practice, parity, managed care, third party reimbursement, serious mental illness, and prescriptive authority.

WPA operates at state and national levels where crucial government decisions affecting your profession are made. As a WPA member, you have opportunities to influence government leaders.

Our listserv is available to members only. Our website, www.wypsych.org, keeps members and the public informed about psychology in Wyoming, allows you to post your professional information to the site, and provides the public a psychologist search feature for any participating member. Annual meetings provide opportunities to earn continuing education units close to home, and WPA has an approval process for CEU's not sponsored by WPA or APA.
